Ceramiche Refin wins with Karim Rashid

Refin has received one of the three awards as "The best stand decoration" at Cersaie 2008, designed by Karim Rashid.

The stand of Ceramiche Refin at Cersaie 2008 was covering a 450sqms surface, in which, along with R+evolution, the brand-new Fluid and Eco-Leader collections have been presented.

Fluid collection, a ceramic series characterized by glossy reflections matt strokes, delicate shade-on-shade interlocks to create vibrant, engulfing, refined surfaces.

Here design becomes the protagonist and creates innovative spaces. R+evolution, the innovative ceramic series designed exclusively for DesignTaleStudio by Karim Rashid.

Flooring and wall cladding dress spaces with shapes and colours featuring a modern design, thus creating an effect of chromatic motion.

Eco-Leader collection is another significant proposal, on the theme of environmental responsibility, an issue that the company has always been committed to, manufactured using at least 40% recycled material and complying with the Leed certification requirements (Leadership in Energy and Environmental Design), promoted by the U.S. Green Building Council, the most important American certification for energy and environmental safeguard.
